April 2011

To Whom It May Concern:

It is my pleasure to recommend Allison Peters. I had the opportunity to work with Ms. Peters for approximately a year during a consulting and interim engagement as the Assistant Vice President of Surgical Services at ShandsUF Hospital in Gainesville, Florida. At that time Ms. Peters was a Clinical Leader in the 23 suite main OR. During the engagement I had the opportunity to direct, coach and mentor Ms. Peters. She has good natural instincts and takes coaching and direction well. She showed significant growth as a manager and leader during the period of time she and I worked together.

Ms. Peters is an attentive and aware manager approaching people and issues within the surgical services environment with focus and creativity. She is a quick learner with a propensity for action. Ms. Peters participated and assisted in the implementation of a large process improvement project.

Ms. Peters brings excellent clinical skills and a thorough understanding of people and management to her daily duties. I would be pleased to have Ms. Peters work for me again in any management capacity within the operating room environment and recommend her without reservation.

If you have any questions or would like to discuss Ms. Peters' attributes further my contact information is listed below.

Sincerely,

Fred Danforth, RN, MBA
